1000L Drum	\$0.95 p/head	\$0.19 p/head

Prices are correct at time of printing & inc GST (Starter Packs also available in 200L & 1000L)

Specifically designed for phosphorus deficient areas of Australia, White Cap plays a part in correcting mineral deficiencies in cattle & sheep but its biggest advantage is the feed conversion benefits. With the ability to make nutrients more absorbable and have a better retention rate it aids to improve the health & performance of your livestock ensuring they get the most out of anything they are consuming.

- ✓ Feed conversion of both dry & green feed
- ✓ Supports rumen development in young animals
- ✓ Assist in improving fertility & survival rates
- ✓ Aids in tightening up calving/lambing periods with a more even drop
- ✓ High amino acid content (the building block of protein)
- ✓ Readily absorbed by the rumen aiding in rumen development of poorer doing livestock.
- ✓ Nil withholding

APPLICATION

Dispense into water troughs using the Beachport Dispenser (or pour directly into water tanks) every 6 weeks or at key times of stress; Prejoining, Late Pregnancy, Sires prior to mating and to improve feed conversion to maximise production.
