

WHY USE IT?

THE BENEFITS OF BEACHPORT

Sustainability and profitability are central to Beachport Liquid Minerals core values. Our unique, cost-effective supplement range saves time, money, and reduces stress with a simple 3-day water trough application lasting in the bloodstream for up to 6 weeks. It boosts productivity by improving animal health, weight gain, and reproduction while cutting labour and transport costs. The range simplifies management, provides year-round support, and addresses key health risks like trace element deficiencies, grass tetany, and milk fever, improving survival and productivity during critical stages.

BENEFITS FOR PRODUCERS

- ✓ **Saves time and money** with our cost-effective Beachport Dispenser, requiring just a 3-day water trough application, with one dose lasting up to 6 weeks. It reduces transport, labour, and animal stress.
- ✓ **Flexible application:** if water application isn't possible, it can also be mixed with feed.
- ✓ **Reduces costs** through lower labour demands and reduced supplement usage, no need for yarding or injections.
- ✓ **Simple dosing:** easy-to-calculate dosage based on the number of animals and product required.
- ✓ **Supports sustainability** and promotes environmental responsibility and animal welfare.
- ✓ **Increases profitability** by lowering costs and improving production outcomes.
- ✓ **Facilitates calmer and faster weaning**, reducing stress for both livestock and handlers.
- ✓ **Simplifies animal handling** by eliminating yarding, keeping livestock calmer and easier to manage.

BENEFITS FOR LIVESTOCK

- ✓ **Enhances feed conversion** for both dry and green feed.
- ✓ **Aids trace element deficiencies** with a blend of up to 10 chelated trace elements and 15 amino acids.
- ✓ **Offers nutritional benefits** by strengthening the immune system via easily accessible nutrients to the blood stream, thus reducing susceptibility to parasites and disease in stress times.
- ✓ **Boosts pregnancy rates** and helps increase newborn survival rates.
- ✓ **Supports animals during critical stages** like joining, pregnancy, calving/lambing, weaning and lactation.
- ✓ **Compliments and aids the rumen** during dietary changes.
- ✓ **Minimises transport stress**, reducing shrinkage and helping animals return to feed more quickly after transit.
- ✓ **Lowers stress during feedlot transitions**, improving animal adaptation.
- ✓ **Promotes overall animal health and productivity**, leading to better outcomes.

UNLOCKING THE BENEFITS THE INGREDIENTS IN BEACHPORT

Beachport Liquid Minerals' success lies in its unique formulation which goes far beyond a standard trace element supplement. Combining a powerful ingredient blend with a specialised manufacturing process, Beachport offers a truly unique solution in the livestock supplement market. This innovative formula boosts livestock health, productivity, and profitability, making it the trusted choice for producers seeking to optimise their livestock's potential year-round.

The powerful blend of naturally sourced amino acids from kelps and seagrasses, combined with natural organic electrolytes, forms the base of the product range. Each product includes chelated trace elements to enhance livestock health, growth, disease resistance, and reproduction. By utilising seagrass science and our unique chelation method, the formulation ensures efficient absorption into the bloodstream and overall animal wellbeing.

15 AMINO ACIDS

All Beachport products are enriched with 9 essential amino acids and 6 non-essential amino acids, derived from seagrass and kelps. These amino acids, the building blocks of protein, deliver vital nutritional and production benefits to support your livestock's health and performance, helping with:

- ✓ Tissue repair & muscle development
- ✓ Weight gain
- ✓ Protein synthesis & balance
- ✓ Blood haemoglobin
- ✓ Absorption & conservation of calcium
- ✓ Milk production
- ✓ Immune system
- ✓ Estrogen production & growth
- ✓ Bone & coat health
- ✓ Stress & nervous system (stimulates endorphin)

ORGANIC ELECTROLYTES

Fulvic acid is one of nature's most powerful natural electrolytes. It is completely soluble, can bond and dissolve minerals and nutritional elements and is capable of carrying 60 or more minerals and trace elements into cells.

This allows the liquid supplements to pass through the rumen, undegraded, for a more energy efficient and functional absorption directly into the bloodstream via the small intestine.

UP TO 10 TRACE ELEMENTS

The major elements and trace elements that make up Beachport products are essential minerals which are important to daily functions.

They are bonded and coated to ensure they are not degraded in the rumen and available directly into the bloodstream.
