

IMPROVE RESULTS DURING TRANSPORTATION WITH GREEN CAP

Green Cap is designed to naturally calm livestock, improving their ability to cope with stress during yarding and transportation. While stress reduction is its primary goal, Green Cap also features Beachport Liquid Minerals unique blend of amino acids, electrolytes, and trace elements. This combination not only alleviates stress but also supports overall health by promoting optimal hydration, enhancing nutrient absorption, and maintaining essential bodily functions. Consequently, Green Cap provides comprehensive nutritional support, making it an invaluable supplement for livestock well-being.

TRANSPORTATION BENEFITS

- ✓ Natural formulation aids in lowering stress levels. A calmer animal travels better.
- ✓ Decrease shrinkage during transportation.
- ✓ Animals remain hydrated during travel and helps retain moisture for better travel conditions.
- ✓ Application flexibility – for best results use in water supply but can be mixed with feed.
- ✓ Aids in reducing dark cutters and improving MSA grading.
- ✓ Aids with 'dead gut' with animals going back onto feed and water more efficiently.

APPLICATION

Apply via water trough using Beachport Dispenser over a three-day period. Refer dose rates on the drum for correct amount per head. The Beachport Dispenser slowly meters out the Green Cap over 72 hours and the supplement is replaced by water.

The ideal time frame is between one week to three days prior to trucking. It is important to note, dosing within a 24hr period of travel will significantly reduce the chance of optimal results.

COST PER HEAD

Drum size	Doses per drum	Cost per 50ml dose
1L	20	\$3.95
10L	200	\$1.66
20L	400	\$1.36
200L	4,000	\$1.25
1000L	20,000	\$1.18

**based on
adult cattle
dose of
50ml p/h*

COST PER HEAD

Drum size	Doses per drum	Cost per 10ml dose
1L	100	\$0.79
10L	1,000	\$0.33
20L	2,000	\$0.27
200L	20,000	\$0.25
1000L	100,000	\$0.24

**based on
adult sheep
dose of
10ml p/h*

ACTIVE INGREDIENTS

15 AMINO ACIDS
via seagrass and kelp

ORGANIC NATURAL ELECTROLYTES
via fulvic acid

9 CHELATED TRACE ELEMENTS

- ✓ Cobalt
- ✓ Copper
- ✓ Iodine
- ✓ Magnesium
- ✓ Manganese
- ✓ Potassium
- ✓ Selenium
- ✓ Sulphur
- ✓ Zinc
